

I am concerned that new regulations effecting FM broadcasting might cause KLOVE radio to be pushed from the airwaves. KLOVE offers listeners an alternative to main stream radio formats. It provides family friendly programming and current national news for me as one of its listeners. If the KLOVE signal is subjugated by LPFM signals I will have lost my main source of radio entertainment and national news. Keeping KLOVE on the air is important to the public interest in that it does provide a segment of the listening population with uplifting, family friendly, interesting programming.

Thank you for your attention to this matter.
